

MAS IT SIN for Security Solutions

HIGHLY ADAPTIVE CYBERSECURITY SERVICES

Highly Adaptive Cybersecurity Services (HACS) Special Item Number (SIN) 54151HACS

In collaboration with the Department of Homeland Security (DHS) Cybersecurity and Infrastructure Security Agency (CISA) and Office of Management and Budget (OMB), GSA developed the Multiple Award Schedule Information Technology (MAS IT) HACS SIN to make it easier for agencies to procure quality cybersecurity services. The HACS SIN is designed to provide government organizations with access to cybersecurity vendors and to help organizations meet IT security requirements outlined in:

- ❖ OMB Memoranda 22-09, "Moving the US Government Toward Zero Trust Cybersecurity Principles"
- ❖ OMB Memorandum 19-03, "Strengthening the Cybersecurity of Federal Agencies by Enhancing the High Value Asset Program"
- ❖ OMB Memorandum 17-12, "Preparing for and Responding to a Breach of Personally Identifiable Information"
- ❖ The Chief Information Security Officer (CISO) Handbook, published on www.cio.gov/resources/ciso-handbook/

54151HACS Includes a wide range of fields such as, the seven-step Risk Management Framework services, information assurance, virus detection, Zero Trust Architecture, network management, situational awareness and incident response, secure web hosting, backups, security services, and Security Operations Center (SOC) services.

There are five subcategories under the HACS SIN. Vendors listed within each subcategory in GSA's eLibrary have passed an oral technical evaluation. The five subcategories are:

- ❖ High Value Asset Assessments
- ❖ Risk and Vulnerability Assessments
- ❖ Cyber Hunt
- ❖ Incident Response
- ❖ Penetration Testing

If you have questions about the HACS SIN, please contact us at **ITSecurityCM@gsa.gov**.

For more information about HACS, please visit **www.gsa.gov/hacs**.

Benefits of Using the HACS SIN

The SIN is available through MAS IT, a well-managed Tier-2 Spend Under Management vehicle, the use of which aligns with OMB Memorandum 19-13 “Category Management: Making Smarter Use of Common Contract Solutions and Practices.”

- ❖ This SIN gives agencies access to technically evaluated cybersecurity vendors within various socioeconomic categories.
- ❖ The SIN also enables rapid ordering and deployment of services using MAS IT’s streamlined ordering procedures that reduce procurement lead times by 25 to 50% compared to open-market ordering.
- ❖ Our Ordering Guide can help procurement officials rapidly solicit services from the HACS SIN.
- ❖ Helpful acquisition documents, such as Statement of Work (SOW) templates, are available on the Acquisition Gateway and GSA’s IT Security website at www.gsa.gov/hacs.
- ❖ Cybersecurity and acquisition subject matter experts are available to help with HACS procurements.

How to Order

Easy Ordering Process:

Make purchases through eBay and *GSAAdvantage!*®. You can also issue a Request for Information (RFI) or a Request for Quotation (RFQ) and allow vendors to respond to your requirements. Federal, state*, and local* governments can purchase products, services, and solutions through the MAS IT:

- ❖ Learn more about how to order at www.gsa.gov/masbuyers
- ❖ Check out the HACS Ordering Guide at www.gsa.gov/hacs

Ordering Process for State and Local Governments:

State and local governments can buy technology via MAS IT through the GSA Cooperative Purchasing Program:

- ❖ Visit our website to learn more and to find out whether your government entity qualifies and what fees may apply: www.gsa.gov/stateandlocal

If you have questions about the HACS SIN, contact us please at ITSecurityCM@gsa.gov.
